# SPA-N-DECK FACT SHEET

## **Description**

*Spa-N-Deck Exterior Timber Finish* is a 100% acrylic, premium quality coating for all timber species. It will protect and decorate timber decks, weatherboard cladding as well as outdoor furniture. It provides unsurpassed appearance and protection in the most severe ultraviolet environments. *Spa-N-Deck* bonds "in" and "on" the wood, providing a tough durable lustrous finish that enhances the natural character of the wood.

## **Purpose**

To protect and decorate exterior timber with a minimum of time. *Spa-N-Deck* is the fast and best way to coat all decking, as most decks can be cleaned and coated in one day. Ideal for both trade & D.I.Y projects.

## **Application**

Apply the first coat of *Spa-N-Deck* to wet timber with a brush or lambs wool applicator. *Spa-N-Deck* can be sprayed then back brushed. Be sure to apply *Spa-N-Deck* with the grain and treat only 2 to 3 boards at a time for the full length of the board. **Note:** Both Powerlift and *Spa-N-Deck* Prep must be used on all hardwood timber before application of *Spa-N-Deck*.

## **Drying Time**

Touch dry 1-2 hours depending on the surface condition and temperatures, and recoat 4 hours.

## **Container Size**

*Spa-N-Deck* is available in 2.5, 4 and 10ltrs.

## **Coverage**

Depending on surface porosity. *Spa-N-Deck* will cover 6 to 8 sqm per litre.

## **Clean-up**

Water.

## **Safety Directions**

Follow common sense painting procedures.

## **Waste Disposal**

Dispose of any excess product in accordance with local regulations.
