TECHIBOND N102 ADHESIVE

TECHNICAL DATA SHEET

DESCRIPTION & USES:

Techibond N102 is a solvent based contact adhesive used for fixing vinyl skirting to plaster, timber and metal substrates.

METHOD OF APPLICATION:

- To obtain the best possible results, the surfaces to be bonded should be dry, clean and free from dust, grit, loose materials, oil or grease.
- Apply an even coat of adhesive to both surfaces by brush or roller. On porous surfaces a second application may be required.
- Allow solvent to evaporate and adhesive to become tacky. Place the surfaces together making sure that they are correctly positioned beforehand as no adjustment is possible after the surface has met.
- Press both surfaces together; making sure sufficient pressure is applied to bring both surfaces into close contact.

PROPERTIES:

- Appearance: Light yellow coloured liquid.
- Viscosity: Brushable syrup.
- Specific gravity: Approx. 0.84

CLEAN UP:

Clean up using Techibond N or NC Solvent.

Note: Additional information on physical properties, health hazards, storage, handling and transport is available in the Material Safety Data Sheet (MSDS).
