

LOBADUR® 

Whitener

Additive

Additive for brightening wood surfaces

For the most various requirements - can be used in different systems

LOBADUR® Whitener is an additive for water-based LOBADUR® primers and finishes for a smooth brightening of wood floors. The intensity of the whitening may be individually controlled by variable application in one or more layers.

LOBA - Your partner for surface finishing and care

Why end users are convinced of Whitener:

- Creates a smooth brightening of the wood surface
- Intensifies the whitening effect of white colored surfaces
- Reduces the natural yellowing of the wood
- Provides individual design options
- Water-based technology, solvent-free

Why contractors are enthusiastic about Whitener:

- Simple and safe application
- Versatile use
- For a wide range of requirements
- Variable control of brightening intensity
- 24 months shelf life

Special feature

LOBADUR® Whitener may be combined with all water-based primers and finishes from LOBA to meet a wide range of requirements. The use in one or more layers makes the system extremely flexible and offers numerous design options.

Range of use

Suitable for all light wood species as well as light-colored wood surfaces. For dark wood species we recommend consultation with LOBA. Preferably recommended for matte finishes.

Application

	Non-ambering	Light brightening	Medium brightening	Strong brightening
2. Coat			✓	✓ ✓*
1. Coat		✓	✓ ✓*	✓ ✓*
Primer	✓	✓		✓

*Application with 2K InvisibleProtect

- Shake Whitener and primer/finish well
- Application in matte finishes reduces the risk of lap marks
- Add Whitener immediately before application, maximum one container (1x80 ml) to 5l/kg
- After adding Whitener, shake thoroughly or stir in (e.g. mechanically with a LOBATool paint mixer).
For 2K systems, Whitener is added after the hardener has been worked into the mixture
- Mixture with Whitener is to be applied within 24 hours, 2K systems within the specified application time

Art.-no. 11540

Available in 80 ml
