Turf-Weld Temperate Synthetic Grass Adhesive

TECHNICAL DATA SHEET

DESCRIPTION & USES:

Turf-Weld Temperate is a solvent based outdoor grass adhesive used for the installation of outdoor grass carpet in outdoor applications. The adhesive will adhere to most common absorbent building substances.

METHOD OF APPLICATION:

- The surface should be clean, dry, free from dust, grease, oil, and contaminants. Concrete must be cured and free of any curing compounds. Refer to Australian Standard 2455- Textile Floor Coverings Installation Practise- General.
- Spread the adhesive with the recommended “V” notched trowel and allow a short time to tack-up before placing carpet.
- Tack up time can be determined by placing a small piece of synthetic grass into the adhesive. “Legs” of adhesive should be apparent when the synthetic grass is pulled away.

PROPERTIES:

- Appearance: Green thick paste.
- Viscosity: Trowelable thick paste.
- Specific Gravity Approx 1.0

Note: Additional information on physical properties, health hazards, storage, handling and transport is available in the Safety Data Sheet (SDS).
